

Business Software Consultant

About You

- ◆ You can quickly understand how businesses work and what gives them their competitive advantage.
- ◆ Your superior communication skills allow you to quickly understand information gathered in meetings, over the phone and through e-mail.
- ◆ You understand the basics of how information systems work and are interested in designing software to solve business problems.
- ◆ You know how to listen actively.
- ◆ You would be comfortable with questioning company owners about business practices.
- ◆ You are personable and enjoy establishing and maintaining relationships with others.
- ◆ You are skilled at producing coherent business analysis documents such as those required from you in case analysis.
- ◆ You have completed (or are in the process of completing) your business degree.
